

ART/TECHNOLOGY LESSON
JOE PRICE-COACH
LEAH FRANCO-MENTOR & TERESA GUESS-TEACHER

My focus on the last lesson was insuring that the teacher completely understood the software. I was there to understand her lesson and how we could apply the software to her lesson. I approached this lesson in the same way...we were very detailed and explicit on the software end. However, I wanted my coach to observe my relations with the teacher. I wanted to know if I was thoroughly understanding what was being created, what was needed from the students, what was needed from the software, what was needed from me, the mentor. I wanted my coach to observe my relations with the teacher as to was I created a sense of security, trust, interdependence; was I supportive...and this list goes on. As a matter of fact, here is my list of...."Did I does?"

Did I cover/understand?	Comments	Suggestions
Lesson objectives	You asked about the lesson objectives and then immediately asked about the end product.	I think you should have had the mentee state the objectives and then tie them in to the end product.
end Product		
Skills/knowledge needed?	Good lead in with your questioning. I liked the suggestion about the students who may be a source of help.	Excellent job
Needs/assistance for learning disabled and G/T students?	I liked the break down of the potential student problems and the discussion of them on an individual basis.	You might want to get more information on the student with physical limitations. They may need assistive equipment.
Technology skills needed?	Letting her know what skills you had already taught some of the students was a nice touch. Nice follow up on the scanner information.	
Classroom Management ideas/techniques....	Nice way to remind the mentee about the problems of being in the library. Good warning comment on the popups.	
Why technology was being used in this	I don't think it was	

lesson.....	specifically mentioned in the video but I understood it to be computers for the students and a multimedia software package.	
did I convey...		
a sense of trust/cooperation?	Yes, I got the feeling that both of you work well together. You comment about the stick figure was a great way to make the mentee comfortable and also out her on the same level as you.	
assistance when needed?	Yes, I liked the way you came in with suggestions at just the right point to get the mentee to think a little deeper.	
Understanding of lesson/goals?	I believe you had a clear understanding of what the lesson required to reach the goal.	
Tutoring/help available other than myself?	Yes with your suggestion that some of the students would be a good resource for help.
